Order Your Labels

What will you get?

When you order your customized mineral labels, you will receive a PDF file containing 18 labels on the sheet. You can print out this sheet, write your specimen information on the labels, and then carefully cut out the labels from the sheet. You will also receive the sheet as an MS Publisher file. If you have Publisher on your computer, you will be able to type your mineral information onto the labels. (If you have an open source software program, it should be able to convert the Publisher file to the open source format which you could then use to type your mineral information onto the labels.)
